I. NCI History and Activities

This section briefly describes the history of the National Core Indicators and NCI Surveys

Overview of National Core Indicators

In December 1996, the National Association of State Directors of Developmental Disabilities Services (NASDDDS), in collaboration with the Human Services Research Institute (HSRI), launched the Core Indicators Project (CIP). The aim of the project was to support state developmental disabilities operating agencies in the development and implementation of performance and outcome indicators—and related data collection strategies—so that they could measure service delivery system performance. This effort, now called National Core Indicators (NCI), strives to provide states with valid and reliable tools to help improve system performance and better serve people with intellectual and developmental disabilities and their families. Moreover, NASDDDS' active sponsorship of NCI facilitates pooled knowledge, expertise, and resources among the states.

In 1997, 15 states convened to discuss the scope and content of a potential performance measurement framework. Directors and staff from these 15 states worked to identify the major domains and sub-domains of performance, indicators, measures, and data sources. The original 61 indicators, developed through a consensus process, were intended to provide a system-level “snapshot” of how well each state was performing. The states were guided by a set of criteria that was designed to select indicators that were:

1. Measurable;
2. Related to issues the states had some ability to influence; and
3. Important to all individuals they served, regardless of level of disability or residential setting.

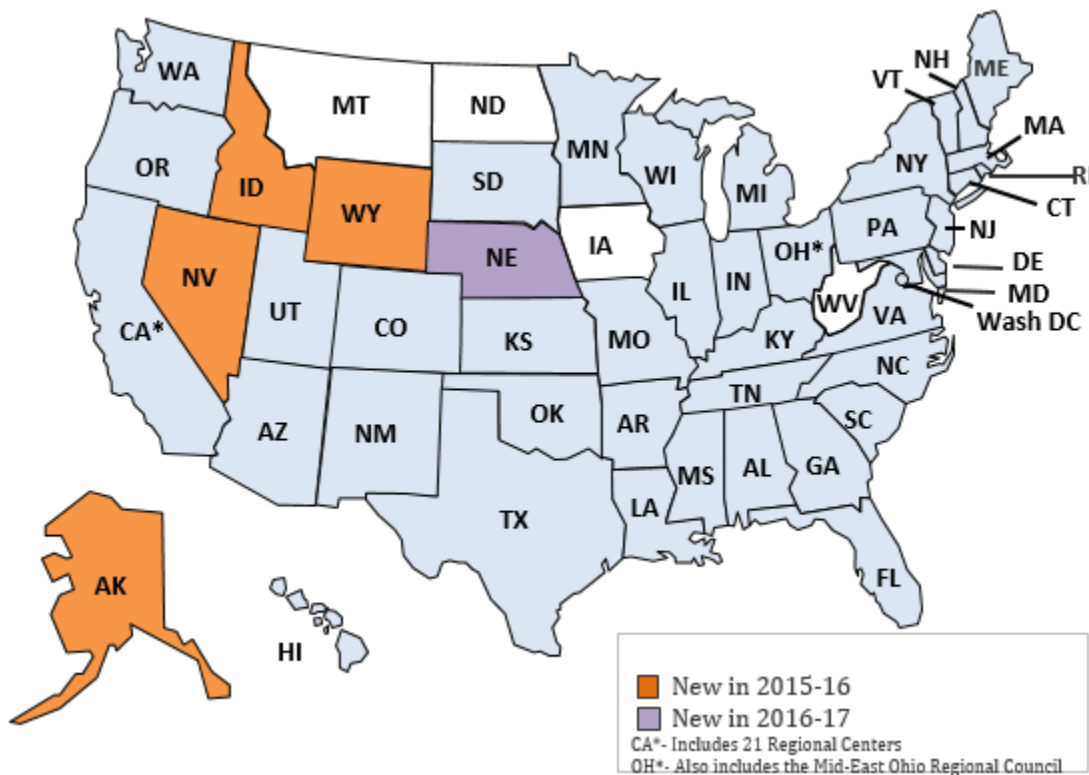

During this initial phase, data collection protocols were developed and field-tested, including a face-to-face Adult Consumer Survey (for individuals age 18 and older who were receiving services) and a mail-out Adult Family Survey (for families who have an adult family member living at home). Seven states volunteered to pilot test the indicators. Eight additional states served on the Steering Committee.

Since the initial field test, NCI has expanded its scope to include outcomes of services for children with intellectual and developmental disabilities and their families. In addition, NCI continues to develop and refine the indicators and expand state participation. For more information about NCI states, technical reports, and other resources, please visit <http://www.nationalcoreindicators.org>.

State Participation

During the 2015-16 data collection cycle, 45 states, the District of Columbia, and 22 sub-state entities participated in NCI. State participation is entirely voluntary, and the participating states are shown in the chart below. Not all NCI member-states participate in all surveys in each year.

Figure 1. NCI State Participation

The Core Indicators

The Core Indicators are the standard measures used across states to assess the outcomes of services provided to individuals and families. Indicators address key areas of concern, including employment, respect/rights, service planning, community inclusion, choice, and health and safety. An example of a Core Indicator would be, “The proportion of people who have a paid job in the community.” To see the entire list of Core Indicators, please visit <http://www.nationalcoreindicators.org/indicators>.

Each survey instrument is designed to measure certain Core Indicators. While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the indicator that measures Community Inclusion (the proportion of people who regularly participate in everyday integrated activities in their communities) is measured by several survey questions that ask about several separate community activities.

The current set of performance indicators includes approximately 100 consumer, family, system, and health and safety outcomes—outcomes that are important to understanding the overall health of public developmental disabilities agencies. Indicators are organized across five broad domains: Individual Outcomes; Health, Welfare and Rights; Staff Stability and Competency; Family Outcomes; and System Performance. Each domain is broken down into sub-domains (see Figure 2). Four data sources are used to assess outcomes: the Adult Consumer Survey, three Family Surveys; NCI also produces a Staff Stability Survey (e.g., staff turnover).

The indicators have remained generally consistent over the last several years and thus can be used to analyze system-level trends over time. However, the NCI program is a dynamic effort that allows for measures to be added, dropped, or changed to reflect current and future priorities of participating states, so year-to-year comparisons should be made with caution.

The data collection tools used to gather indicator data are regularly refined and tested to ensure they remain valid, reliable, and applicable to current issues within the field. Details on the design and testing of this tool are provided in the next section of this report.

Figure 2 Adult Consumer Survey Indicators: Domains and Sub-Domains

Domain	Sub-Domain	Concern Statement
Individual Outcomes	Work	People have support to find and maintain community integrated employment.
	Community Inclusion, Participation and Leisure	People have support to participate in everyday community activities and do things they like to do.
	Choice and Decision-Making	People make choices about their lives and are actively engaged in planning their services and supports.
	Self-direction	People have authority and are supported to direct and manage their own services.
	Relationships	People have friends and relationships.
	Satisfaction	People are satisfied with the services and supports they receive.
Health, Welfare, and Rights	Safety	People feel safe and free from fear.
	Health	People secure needed health services.
	Medications	Medications are managed effectively and appropriately.
	Wellness	People are supported to maintain healthy habits.
	Respect/Rights	People receive the same respect and protections as others in the community.
System Performance	Service Coordination	Service are accessible, responsive, and support the person's participation in service planning.
	Access to Supports	People have access to quality supports.

How NCI Data Are Used

The Core Indicators provide information for quality management and are intended to be used in conjunction with other state data sources, such as risk management information, regional level performance data, results of provider monitoring processes, and administrative information gathered at the individual service coordination level. States typically use the indicator data to inform strategic planning, produce legislative reports, and prioritize quality improvement initiatives. Some states use NCI as a data source for supplemental performance measures in their home and community-based services (HCBS) waiver quality management systems and include the information in support of evidentiary reports to the Centers for Medicare & Medicaid Services (CMS). Many states share the indicator data with stakeholder groups such as Quality Councils and use the stakeholder feedback to help set priorities and establish policy direction. It is also important to note that states do not use the information to sanction service providers, nor do they use the results to remediate individual issues (unless specifically requested by the participant or required by law as in the case of suspected abuse, neglect, or mistreatment).

Caution and Limitations

This report does not provide benchmarks for acceptable or unacceptable levels of performance. Rather, it is up to each state to decide whether its score or percentage is an acceptable performance level. States that fall into the “below average” tier on any scale or indicator are not necessarily underperforming; instead, this placement indicates only that the state’s scale score or indicator percentage is significantly lower than the average of all states—where “significantly” means “not due to chance.” The results tables throughout this report displays states’ scores relative to one another and show which states tend to have similar results. Notably, the difference between a “below average” state and the average across the other states may be very small, and it is up to public managers, policy-makers, and other stakeholders to decide whether a state’s result relative to the NCI Average suggests that changes or further investigation are necessary.

Moreover, the NCI Average should not be interpreted as defining “acceptable” levels of performance or satisfaction. Instead, it represents a multi-state “norm” that describes average levels of performance or satisfaction across the participating states. In some instances, there are few significant differences among the states; this denotes that most states are performing similarly. Instances in which several states’ results are especially high (statistically significantly above the average level) indicate the levels of performance or satisfaction achieved in those states might define a level of performance that may serve as a guidepost for other states.

Data from previous years are not presented in this report. Comparisons of results from year to year should be made with caution: even slight changes in wording or response options of certain questions may affect comparability of results from one year to the next; the mix of participating states differs slightly each year and

may affect the NCI Averages; and states draw new samples each year rather than following the same group of individuals.

II. Methodology

This section describes the protocol for administering the Adult Consumer Survey, including sampling criteria, administration guidelines, and surveying procedures.

Administration

A key principle of NCI is the importance of gathering information directly from service recipients. The indicators are meant to apply to all individuals receiving services from the state developmental disability agency, regardless of disability type, and NCI administration protocols dictate that every person selected into the sample be given an opportunity to respond (no one is prescreened or predetermined to be unable to respond). Moreover, survey questions should not be marked “not applicable” on the basis of a person’s level of ability.

Information for the Adult Consumer Survey Sections I and II are collected via a direct conversation with the person receiving services. Additionally, background information is primarily collected from the individual’s record. Section I questions, which pertain to personal experiences and require subjective responses, may only be answered by the individual receiving services. Section II of the survey—which consists of objective questions on the individual’s involvement in the community, their choices, respect and rights, and their access to services—allows for the use of “proxy” or other respondents who know the individual well (such as a family member or friend).

Proxy Respondents

Studies have found that the greatest discrepancies between individual and proxy responses occur when the information being collected is subjective (i.e., related to how a person feels; proxies would be aware of the correct answers only if the individual had previously expressed his or her feelings)¹. Questions relating to observable behaviors tend to have higher levels of agreement between individual and proxy. By excluding proxies, a large percentage of individuals (many of whom may be unable to respond) would be unrepresented in the data. Thus, the NCI project determined at the outset that proxy respondents would be used, though only for specific questions and only in situations where the individual him/herself either could not effectively communicate with the surveyor or chose to have a proxy respondent.

As mentioned, the use of proxy respondents for the NCI tool is limited to questions in Section II, which relates to observable and/or measurable items: Community Inclusion, Choices, some questions related to Respect/Rights, and Access to Needed Services. State records are also used to report objective data on an individual’s health status and exam history as well as employment status; this information is collected in the Background Section of the survey.

¹ Magaziner, Jay, Sheryl Zimmerman, Ann L. Gruber-Baldini, J. Richard Hebel, and Kathleen M. Fox. "Proxy Reporting in Five Areas of Functional Status Comparison with Self-Reports and Observations of Performance." *American Journal of Epidemiology* 146.5 (1997): 418-28.

There are also ways to reduce discrepancies that may arise. First, it is important to make the questions as accessible as possible to increase participation by all individuals. NCI attempts to make the language in the Adult Consumer Survey as easy to understand as possible and the survey tool includes suggested rephrasing for questions to facilitate comprehension. Secondly, it is important to establish a set of standards for proxy respondents. NCI aims to increase the reliability of proxy responses by allowing only those people who know the individual well (family, friends, staff, etc.) to serve as proxy respondents. To avoid conflict, service coordinators are not allowed to respond as proxies. Further, if both the individual and a proxy respondent answer a question, the individual's answer is recorded so long as his/her answer is deemed reliable by the surveyor. Surveyors also keep track of who responds to each question—the individual or the proxy—and the proxy's relationship to the individual.

Surveyor Training

States employ a variety of individuals to conduct the face-to-face meetings for the NCI Adult Consumer Survey. To avoid conflict, surveys cannot be administered by the individual's service provider, relative, personal case manager, staff member, or other close contact. Given this constraint, states may use university students, state staff, private contractors, employees of advocacy organizations, and individuals with disabilities and their families to conduct the surveys.

Standardized training for surveyors is provided by HSRI and NASDDDS staff via on-site surveyor training to new states and states with a significant change in surveyor staffing as well as through refresher trainings (via webinar) for states that have previously participated. Trainings consist of a detailed review of the survey tool and an overview of general surveying techniques. Trainers are given a packet of standardized materials to be used at the on-site training sessions. In each state, one or more 'Lead Trainers' who are familiar with NCI survey administration may train additional surveyors using standard guidebook and materials developed by HSRI staff.

An additional session reviews the process for entering survey data in the Online Data Entry Survey Application (ODESA).

States are responsible for monitoring the fidelity of the survey administration and accomplish this through methods including survey shadowing (surveyors paired and review scoring after the session, supervisor observes one or more sessions), and meetings of surveyors to review questions that emerge as surveyors complete their first few surveys.

Criteria for Exclusion of Responses

All individuals selected in the survey sample are given an opportunity to participate in a face-to-face meeting. There are no prescreening procedures. Exclusion of responses occurs at the time of data analysis by HSRI, based on the criteria described as follows. There is no threshold of questions that a respondent must answer

for the survey to be considered complete. The total number of surveys used for analysis in 2015-16 was 17,682.

Surveys were excluded from analysis for Section I if:

- 1) The surveyor indicated that the individual receiving supports did not respond consistently to questions in Section I.
- 2) All answers to the Section I questions were either missing or marked as 'N/A' or 'Don't Know'.

Surveys were excluded from analysis for Section II if:

- 1) The individual receiving supports was marked as the respondent to all questions in Section II but Section I was deemed invalid (for one of the reasons above).
- 2) No questions were answered in Section II.

Responses for Section I

Only individuals receiving services may answer questions in Section I. As shown in Figure 3, among the entire 2015-16 sample the valid response rate to Section I was 70%; valid responses by state ranged from 50% to 91%.

Responses for Section II

Section II allows for multiple respondents who know the individual well (e.g., family, friend, support worker) to provide answers. If an individual's responses were excluded from Section I in the final analysis, responses from Section II were also excluded if the individual was the only respondent to Section II. For 2015-16, the valid response rate (proxies included) to Section II was 98%.

Sampling

Each state is instructed to attempt to complete surveys with a random sample of individuals age 18 and over who are receiving at least one publicly funded service in addition to case management. A sample size of 400 guarantees valid comparisons to be made across states with a 95% confidence level and a margin of error of +/- 5%, no matter how large the service population size. A 95% confidence level and a margin of error of +/-5% is mandatory for each state's sample to be included in this report. For states with smaller served populations, this total sample may be less than 400 to reach the 95% confidence level and 5% margin of error. Most states sample more than 400 individuals to account for refusals and surveys that may be deemed invalid. Figure 3 presents the number of surveys completed by state. A more detailed description of each state's sampling strategy can be found in Appendix C.

Why do we ask states to collect 400 surveys?

When NCI asks states to pull a representative sample of 400 surveys, the aim is to compile a dataset that can provide a high level of statistical accuracy. The goal is to create a dataset that can be used to make accurate inferences about the entire population of people using public services in each state. To do this, we ask each participating state to pull a sample that reaches the 95% confidence level/5% margin of error threshold; for most states, this sample size is 400.

A sample size that reaches the 95% confidence level/5% margin of error threshold means that if you sampled that number of people from the same population several times, 95% of your responses would fall within 5% above or below the actual percentages. So using this sample size, we can assume relative accuracy. The larger the sample size, the smaller the margin of error and the greater the accuracy.

Statistical accuracy is largely a function of sample size. The larger the sample size, the greater the statistical accuracy of results (lower margin of error). However, gains in statistical accuracy are not proportional to increases in sample size. There are diminishing returns. For example, for a large total population, if the sample size increases by 100, and then by another 100, and then by another 100, the statistical accuracy might increase by 5%, then by 3%, then by 1%.

As a result, the 400 sample size gives a statistical accuracy of $\pm 5\%$ and is considered the most “cost effective” sample size for large scale surveys. Meaning, you could sample more people but the increase in statistical accuracy that those “extra” people would provide is minimal, and not worth the money.

To play around with this, we recommend you check out <http://www.raosoft.com/samplesize.html>. NCI requires a margin of error at most 5% and a 95% confidence level for the Adult Consumer Survey sample. As you increase the population size (in our case, this represents the service population), you’ll see that the recommended sample size does not increase proportionally.

III. Data Analysis

This section explains the statistical methods used to analyze the Adult Consumer Survey data. It includes an explanation of how certain outcomes are “adjusted” for the purposes of making comparisons across states. This section also discusses scale construction and significance testing of results.

Data Management and Analysis

HSRI coordinates the NCI data management and analysis. States enter data into the Online Data Entry Survey Application (ODESA) system²; HSRI staff subsequently download the data into a data file. This data file is then “cleaned” (reviewed for completeness and compliance with standard NCI formats) and invalid responses are eliminated. Files from individual states are then merged into a single file. The merged file from 2015-16 was used for all analyses in this report. NCI uses SPSS software for data analysis.

Below is a summary of the statistical procedures used to analyze the Adult Consumer Survey data.

Outcome Adjustment

Outcome adjustment or “risk adjustment” is a statistical process used to control for differences in the individual characteristics of people who completed the NCI Survey across states. This procedure allows for more legitimate state comparisons by effectively “leveling the playing field.” This analysis helps account for the fact that states have different eligibility definitions for services and may have samples with different characteristics. Only those indicators that are likely to be affected by individual characteristics were adjusted (e.g., indicators in the Choice and Decision-Making sub-domain). For example, a person who is older and has more cognitive limitations may be less likely to choose where they live. On the other hand, such characteristics should not affect whether a person has friends or staff who are respectful.

The indicators are risk-adjusted using the following characteristics: age, level of intellectual disability, level of mobility, and whether any behavioral supports are needed to prevent self-injury, disruptive, or destructive behavior. Risk adjustment was only done on items in the Choice and Decision-Making sub-domain for this report. In prior years, Community Inclusion items were also risk-adjusted; however, due to the change in types of questions asked, those items are no longer adjusted. In this report, results for indicators that were adjusted are labeled as such, and unadjusted results for these indicators are presented in Appendix D.

Outcome adjustment for the indicators in the Choice and Decision-Making sub-domain was performed using logistic regression. This statistical analysis produces a predicted value that one would expect to observe given the individual’s characteristics. The state’s average observed rate (i.e., the state average prior to risk adjustment) was adjusted by the average predicted rate to produce the risk-adjusted rate. As a result of this procedure, state differences in adjusted values reflect true state differences rather than differences due to the demographic or characteristic makeup of state service populations.

² Beginning in 2013-14, all states are required to enter NCI data into ODESA.

Scale Development

Scales are used to combine responses from multiple similar questions into one variable. In this way, we can measure an overarching concept rather than specific elements of the concept. For the Adult Consumer Survey, scales are used for the Choice and Decision-Making sub-domain and for Community Inclusion. To create a scale, statistical tests are required to ensure that the multiple items share common properties. Scales were created using factor analysis.

The Choice and Decision-Making sub-domain was divided into two scales: Life Decisions and Everyday Choices. These scales were created by averaging the items within those categories³ for each individual. Higher scale scores represent higher levels of choice. These scales were also risk-adjusted.

The Community Inclusion scale was created by averaging the individual's responses to four of the questions relating to whether people went out in the community for particular activities. Higher scale scores represent higher level of community participation as indicated by taking part in these activities in the community. The Community Inclusion scale was not risk-adjusted.

Collapsing Data

For many of the indicators in this report, only "yes" responses are analyzed and reported for state to state comparisons and significance testing. However, there are several indicators for which the "yes" response was collapsed with the middle response (for example, a "sometimes" response, or a "some input" response) to form the "yes" indicator category, which was then analyzed and subsequently reported. For example, for choice indicators, responses "person chose" and "person had some input" were collapsed into one "yes, person chose" category. For those indicators, the two responses were considered to be equally indicative of a positive outcome. Appendix B contains the collapsing and recoding rules for all indicators and risk adjustment variables.

Significance Testing

In this report, for all non-adjusted items, each state's indicator score was compared to the NCI Average (the average across all NCI states estimates) for that indicator. These comparisons were conducted using t-tests.

The t-test analyses determined whether each state's percentage was:

1. Significantly higher than the other states' average (NCI Average, average of averages);
2. Within the average range (i.e., not statistically different from the NCI Average); or
3. Significantly lower than the other states' average.

³ Indicators used for scales are listed in the corresponding sections.

A conservative cut-off point of $p < 0.005$ was used to determine significant differences. The placement of each state into one of these three groups is indicated in tables for each outcome.

Please Note: Statistical significance is influenced by the size of the state's sample. Therefore, it is possible that a state with a lower percentage but a larger sample will be classified as significantly above average while a state with a somewhat higher percentage but a smaller sample will not.

IV. Appendices

Appendix A

Survey Changes 2014-15 to 2015-16

2015-16		2014-15		Change Made	Note
Demographics					
BI-3	Zip code			New question; Added question that automatically gets recoded as an urban/rural designation in ODESA. Zip is not saved	
BI-4	Date of Birth	BI-3	Date of birth	No change	
BI-5	Gender	BI-4	Gender	No change	
BI-6	What is this person's race and ethnicity?	BI-6	What is this person's race	In 2015-16 combined race and ethnicity	
BI-7	Does this person have a legal appointed guardian/conservator	BI-7	Does this person have a legal appointed guardian?	In 2015-16 added response option for those under guardianship but not sure if limited or full	
BI-8	If this person has a legal/court-appointed guardian, what is the guardian's relationship to the individual?			New question	
BI-9	Marital Status	BI-8	Marital Status	No change	
BI-10	Is this person a parent?			New question	
BI-10a	If the person has children under 18 years of age, does the child or children live with the person?			New question	

2015-16		2014-15		Change Made	Note
BI-11	Is this person diagnosed with an intellectual disability (ID)?	BI-9	Is this person diagnosed with an intellectual disability (ID)?	No change	
BI-11a	If yes, what level of ID?	BI-9a	If yes, what level of ID?	No change	
BI-12	What other conditions are noted in this person's record?	BI-10	What other disabilities are noted in this person's record?	Changed word in question from "disabilities" to "conditions"	
BI-12a	What health conditions are noted in this person's record?	BI-10a	What health conditions are noted in this person's record?	No change	
BI-13	What is this person's primary language?	BI-11	What is this person's primary language?	No change	
BI-14	What is this person's preferred means of communication?	BI-14	What is this person's primary means of expression?	In 2015-16, used "preferred means of communication" as opposed to "primary means of expression"	
BI-15	How would you describe this person's mobility?	BI-13	How would you describe this person's mobility?	No change	
BI-16	Does this person have a primary care doctor or primary care practitioner?	BI-15	Does this person have a primary care doctor or primary care doctor?	In 15-16 used term "practitioner" instead of "doctor"	
BI-17	When was his/her last complete annual physical exam?	BI-16	When was his/her last complete annual physical exam?	No change	
BI-18	When was his/her last dentist exam?	BI-17	When was his/her last dentist visit?	2015-16: "exam"	
BI-19	When was the last time this person had an eye exam/vision screening?	BI-18	When was the last time this person had an eye exam/vision screening?	No change	
BI-20	When was the last time this person had a hearing test?	BI-19	When was the last time this person had a hearing test?	No change	

2015-16		2014-15		Change Made	Note
BI-21	During the past 12 months, has this person had a flu vaccination?	BI-20	During the past 12 months has this person had a flu vaccination?	No change	
BI-22	How much does this person weigh?	BI-22	How much does this person weigh?	No change	
BI-23	How tall is this person?	BI-23	How tall is this person?	No change	
BI-24	Does this person use nicotine or tobacco products (e.g., cigarettes, e-cigarettes, chewing tobacco, etc.)?	BI-25	Does this person smoke or chew tobacco?	The question was made more specific.	
BI-25	If female, when was her last pap test screening?	BI-26	If female, when was her last pap test screening?	No change	
BI-26	If female, when was her last mammogram?	BI-27	If female, when was her last mammogram?	No change	
BI-27	When was the last time this person had a screening for colorectal cancer?	BI-28	When was the last time this person had a screening for colorectal cancer?	No change	
BI-28	If this person has a seizure disorder, how often do seizures occur?	BI-30	If this person has seizures, how often do they occur?	Slight wording change	
BI-29	Does this person currently take medications to treat mood disorders, anxiety and/or psychotic disorders?	BI-31	Does this person currently take medications to treat mood disorders, anxiety and/or psychotic disorders?	No change	
BI-29a	If yes, how many medications to treat mood disorders, anxiety and/or psychotic disorders does this person take?	BI-31a	If yes, how many medications to treat mood disorders, anxiety and/or psychotic disorders does this person take?	No change	
BI-30	Does this person currently take medications for behavioral challenges?	BI-31b	Does this person currently take medications for behavioral challenges?	No change	

2015-16		2014-15		Change Made	Note
BI-30a	If yes, how many medications to treat behavioral challenges does this person take?	BI-31c	If yes, how many medications to treat behavioral challenges does this person take?	No change	
BI-31	Does this person have a behavior plan?	BI-31d	Does this person have a behavior plan?	No change	
BI-32	How long has this person lived in his/her current home?	BI-33	How long has this person lived in his/her current home?	No change	
BI-33	How would you characterize the place where this person lives?	BI-34	How would you characterize the place where this person lives?	Response options changed	
BI-33a	Is this person's residence owned or controlled by a provider agency?			New question	
BI-34	If this person lives in an Intermediate Care Facility for persons with ID/DD, a specialized institutional facility, or a group home, is it publicly or privately operated?	BI-34a	If this person lives in an Intermediate Care Facility for persons with ID/DD, a specialized institutional facility or a group home, is it publicly or privately operated?	No change	
BI-35	Is this person named on the lease?			New question	
BI-36	Does this person own his or her own home?			New question	
BI-37	Has this person ever lived longer than a year in an institutional setting such as a nursing home or ICF?			New question	
BI-38	What amount of paid support does this person receive at home?	BI-36	What amount of paid support does this person receive at home?	No change	
BI-39-BI-43 Employment matrix		BI-37-BI-40		Added BI-40: Paid small-group job in a community-based setting	This allowed people to report being involved in individual and group jobs separately.

2015-16		2014-15		Change Made	Note
BI-44	Is community employment a goal in this person's service plan?	BI-41	Is community employment a goal in this person's service plan?	No change	
BI-45	Is this person enrolled in school?	BI-42	Is this person enrolled in the public school system?	Response options in 15-16 delineated the type of enrollment (high school, vocational school, college, etc.). Response options in 14-15 were yes/no	
BI-46	Does this person receive paid time off?	BI-45	Does this person receive paid vacation and/or sick time at his/her job?	Wording changed	
BI-47	How long has this person been working at his/her current job?	BI-46	How long has this person been working at his/her current job?	No change	
BI-48	Is this person self-employed?			Self-employment was included as a response option in question BI-47 (What type of job does this person have?) in 2014-15	
BI-49	What type of job does this person have?	BI-47	What type of job does this person have?	Response options differ	
BI-50	Which of the following services/supports funded by the state (or county) agency does this person receive?	BI-48	Which of the following services/supports funded by the state (or county) agency does this person receive?	No change	
BI-51	Does this person receive either ICF-ID or Medicaid HCBS Waiver or State plan funding?	BI-48	Does this person receive either ICF-ID or Medicaid HCBS Waiver or State plan funding?	Response options differ	
BI-52	Does this person currently receive Medicare?	BI-32	Does this person currently receive Medicare?	No change	
BI-53	Is this person currently using a self-directed supports option?	BI-50	Is this person currently using a self-directed supports option?	No change	

2015-16		2014-15		Change Made	Note
BI-54	If yes, who employs this person's support workers?	BI-51	If yes, who employs this person's support workers?	No change	
BI-55-BI-57-Behavioral support needs		BI-52-BI-54-Behavioral support needs		No change	

Questions not included in the 2015-16 ACS (that were included in the 2014-15 survey)

- Ethnicity
- Overall health moved to Section II
- Pneumonia Vaccine
- Physical activity questions moved to Section II
- How often does this person require medical care?
- Who owns or leases where this person lives?
- Funding for employment/day supports
- Did this person work 10 out of the last 12 months in a community job?

2015-16		2014-15		Change Made	Note
---------	--	---------	--	-------------	------

Home

Q1-6	Home	9-14	Home	Moved to beginning Easier to understand, will typically begin with more positive response	
1	Do you like your home or where you live?	9	Do you like your home or where you live?	No change	
2	If In-between or No: What don't you like about where you live?			New question	
3	Would you like to live somewhere else?	10	Would you like to live somewhere else?	No change	
4	Do people let you know before they come into your home?	12	Do people let you know before they come into your home?	No change	
5	Do people let you know before coming into your bedroom?	13	Do people let you know before coming into your bedroom?	No change	

2015-16		2014-15		Change Made	Note
6	Do you have a place to be alone in your home?	14	Do you have enough privacy at home?	Modified Easier to understand language	Comparisons to previous years' data should be made with caution.
Deleted or Replaced Questions - Home					
11. Do you ever talk with your neighbors?					
Employment					
Q7-13	Employment/Day	1-8	Employment/Day	Moved to second sub-section Helps ease into questions	
7	Do you have a <u>paid</u> job in the community?	1	Do you have a <u>paid</u> job in the community?	No change	
8	If No, ask: Would you like to have a job in the community?	2	If No, ask: Would you like to have a job in the community?	No change	
9	Do you like working there?	3	Do you like working there?	No change	
10	Would you like to work somewhere else?	4	Would you like to work somewhere else?	No change	
11	Do you go to a program or workshop (program or center where other people with disabilities work)?	5	Do you go to a day program or do some other regularly scheduled activity during the day?	Modified Specific to non-inclusive day activity (later ask about classes/other activities)	Parallel comparisons cannot be made from previous years' data.
11a	Would you like to go more or less to the workshop (program or center)			New question Replaces former Q6. Helps determine level of satisfaction with activity and whether there are enough/too many hours devoted	
12	Do you take classes, training, or do something to help you get a job or a better job?			New question	

2015-16		2014-15		Change Made	Note
13	Do you volunteer?	8	Do you do any volunteer work?	Modified Deleted 'work' per state/interviewer suggestion	

Deleted or Rephrased Questions- Employment
6. Do you like going there/doing this activity?
7. Would you like to go somewhere else or do something else during the day?

Safety

14	Are there any places where you feel afraid or scared?			Replaces former Q15-17. Question and response options changed to include more settings where people feel unsafe (e.g., during transport)	Comparisons to previous years' data should be made with caution.
15	If you ever feel afraid, is there someone you can talk to?	18	If you ever feel afraid, is there someone you can talk to?	No change	

Deleted or Rephrased Questions - Safety
15. Are you ever afraid or scared when you are at home?
16. Are you ever afraid or scared when you are out in your neighborhood?
17. Are you ever afraid or scared at work or at your day program/other activity?

Relationships

16	Do you have friends you like to talk to or do things with?	19	Do you have friends you like to talk to or do things with?	No change	
17	Do you want more help to make or keep in contact with your friends?			New Question Gets at whether people have support to make/maintain relationships	
18	Can you see your friends when you want to see them?	21	Can you see your friends when you want to see them?	No change	

2015-16		2014-15		Change Made	Note
19	If no, why can't you see your friends when you want to?			New Question Help states determine whether there are actionable issues (e.g., staff, transportation)	
20	Do you have other ways of communicating with your friends when you cannot see them?			New Question Captures if people can keep in contact via technology	
21	Can you go on a date if you want to?	22	Can you go on a date if you want to?	No change	
22	Do you ever feel lonely?	23	Do you ever feel lonely?	No change	
23	Can you see or communicate with your family when you want to?	24	Do you have family that you see?	Modified Captures if people can keep in contact via technology; in particular, communication with family if the person does not live in the family home	Comparisons to previous years' data should be made with caution.
Deleted or Rephrased Questions - Relationships					
20. Do you have a best friend, or someone you are really close to?					
25. Can you see your family when you want to?					
26. Can you help other people if you want to?					
Community Participation					
Q24, 24a, 25	Community Participation and Leisure			New Question Builds on Community Inclusion (Section II); asks more subjective if people do what they want and when m and if people have enough to do	
24	Are you able to go out and do the things you like to do?			New Question	

2015-16		2014-15		Change Made	Note
24a	Do you get to do the things you like to do as much as you like?			New Question	
25	When you are at home, do you have enough things you like to do? (Do you have things to do so you are not bored at home?)			New Question	
Rights and Privacy					
26	Do people read your mail or email without asking you first?	64	Do people read your mail or email without asking you first?	Moved to Section I Determined that only individuals should answer	Comparisons to previous years' data should be made with caution – specifically by looking only at surveys with a valid Section I and <i>only</i> answers given by the individual.
27	Can you be alone with friends or visitors at your home?	65	Can you be alone with friends or visitors at your home, or does someone have to be with you?	Moved to Section I Determined that only individuals should answer	Comparisons to previous years' data should be made with caution – specifically by looking only at surveys with a valid Section I and <i>only</i> answers given by the individual.
27a	Are there rules about having friends or visitors in your home?			New question Gets at whether people can see friends <i>but</i> with rules/restrictions	
28	Can you use the phone and Internet when you want to?	66	Can you use the phone and Internet when you want to?	Moved to Section I Determined that only individuals should answer	Comparisons to previous years' data should be made with caution – specifically by looking only at surveys with a valid Section I and <i>only</i> answers given by the individual.

2015-16		2014-15		Change Made	Note
Satisfaction					
29	Have you met your case manager/service coordinator?	27	Have you met your case manager/service coordinator?	No change	
30	Does your case manager/service coordinator ask you what you want?	30	Does your case manager/service coordinator ask you what you want?	No change	
31	Do you have a service plan?	28	Do you have a service plan?	No change	
32	Did you take part in the last service planning meeting?	29	Did you help make your service plan?	Modified Better reflects whether people take an active role in service planning	Comparisons to previous years' data should be made with caution.
33	At the service planning meeting, did you know what was being talked about?			New question Determines whether preferred language was used and easy to understand terms.	
34	Did the service planning meeting include the people you wanted to be there?			New question Determines whether person has the people/advocates desired as part of meeting	
35	Were you able to choose the services that you get as part of your service plan?			New question Determines whether people are able to determine the services they want/need	
36	Are you able to contact your case manager/service coordinator when you want to?	32	If you call and leave a message, does your case manager/service coordinator take a long time to call you back, or does s/he call back right away?	Modified Easier to understand; more inclusive of various means to communicate (e.g., email)	Comparisons to previous years' data should be made with caution.

2015-16		2014-15		Change Made	Note
37	Do you have staff who help you?	33	Do you have staff who help you?	No change	
38	Do your staff treat you with respect?	34	Do your staff treat you with respect?	No change	
39	Do your staff come and leave when they are supposed to?	35	Do your staff come when they are supposed to?	Modified Added "and leave"	
40	Do you have a way to get places you need to go (like work, appointments, etc.)?			New question Better gets at whether there is always transportation – specific to places person <i>needs</i> to go	
41	Are you able to get places when you want to do something outside your home, like going out to see friends, for entertainment, or to do something fun?	38	When you want to go somewhere, do you always have a way to get there?	Modified Better gets at whether there is always transportation – specific to places person <i>wants</i> to go	Comparisons to previous years' data should be made with caution.
42	Are services and supports helping you to live a good life?			New question	
Deleted or Rephrased Questions - Satisfaction					
Q31. If you ask for something, does your case manager/service coordinator help you get what you need?					
Community Inclusion					
Q44-50	Community Inclusion	Q48-53	Community Inclusion	Modified (all) Now asks how many times a person went out, response options include frequency; still asks who the person typically goes with	
49	Do you participate in community groups or other activities in your community?			New question Helps get at whether people are integrated in their community	

2015-16		2014-15		Change Made	Note
Deleted or Rephrased Questions - Community Inclusion					
53. In the past month, did you go out for exercise?					
Choice and Decision-Making					
Q51-59	Choice and Decision-Making	Q55-62	Choice and Decision-Making	No changes	
Rights					
60	Do you have a key to your home?			New question	Crosswalks to new HCBS Regulation.
61	Can you lock your bedroom if you want to?			New question	Crosswalks to new HCBS Regulation.
62	Have you ever participated in a self-advocacy group meeting, conference, or event?	67	Have you ever participated in a self-advocacy group meeting, conference, or event?	No change	
63	Have you voted?			New question Helps get at citizenship and rights	
Access					
64	Do you need any of these additional services?	68b	If additional services are needed, please note type of service or support below	Modified Combines former Q68 and Q68b	Comparisons to previous years' data should be made with caution.
65	Do you feel your staff have the right training to meet your needs?	69	Do you feel your staff have the right training to meet your needs?	No change	
Deleted and Replaced Questions - Access					
68. Do you get the services you need?					
Health and Wellness					
66	Overall, how would you describe your health?	70	Overall, how would you describe your health?	No change	

2015-16		2014-15		Change Made	Note
67	Do you exercise or do physical activity?		BI-24-24B	Moved from Background Information section. Data are not typically found in records, will get more accurate information from individuals/proxies	Comparisons to previous years' data should be made with caution.

Self-Directing Module

Self-Directing Module					
Q68-73	Self-direction	Q39-44	Self-direction	Moved to Section II open to anyone directing services (not just on a self-directing waiver) Allows for more respondents to these questions; questions are only asked if the person responding takes part in directing services	Comparisons to previous years' data should be made with caution – in particular, data compared to previous years should note that these data include any person using a self-directed option <i>and</i> questions are only asked to those who take part in directing services.
68	Do you participate in decisions about how to use your supports budget, hiring staff, or managing the services you get?			New question This question will determine if the section should be asked – if no, don't know, or the person answering is staff, questions will not be asked	
69	Who makes decisions about how your budget for services is used?			New question Determines all people who help make decisions including person, family, someone else	
70	Do you hire and manage your staff?			New question Main tenet of self-direction	

2015-16		2014-15		Change Made	Note
71	Can you make changes to your budget/services if you need to?	41	Can you make changes to your budget/services if you want to?	No change	
72	Do you have enough help deciding how to use your budget/services?	42	Do you want more help deciding how to use your budget/services, or do you have enough help?	Modified Clearer question	Comparisons to previous years' data should be made with caution.
73	Do you get information about how much money is left in your budget/services?	43	Do you get information about how much money is left in your budget/services?	No change	
73a	If yes, is the information easy to understand?	44	If yes, is the information easy to understand?	No change	
Deleted and Replaced Questions - Self-Direction					
39. Does someone talk with you about your budget and the services you can get?					
40. Is there someone who helps you decide how to use your budget/services?					

Appendix B

Rules for Recoding and Combining Variables to Compute Core Indicators

Sub-Domain	Table label	Updated for 15-16	Variable name used in calculation	How its filtered	Tested for significance?
Demographics	Urban/Rural	New for 15-16	BIZIP	Don't Know shown	
	Age (Variable used for risk adjustment)		AGE		
	Age Category	New for 15-16	Age_categ <i>Categorical variable created for the following categories:</i> <ul style="list-style-type: none"> • 18 thru 22 • 23 thru 34 • 35 thru 54 • 55 thru 74 • 75 and above. • Unknown 		
	Gender		GENDER		
	Marital Status		MARSTAT	Don't Know shown	
	Person is a parent	New for 15-16	PARENT15_1 PARENT15_2	Don't Know shown	

			PARENT15_3 PARENT15_99		
Race	Race and ethnicity combined into one variable for 15-16		RACE <i>Categorical variable created using variables:</i> RACE151 RACE152 RACE153 RACE154 RACE155 RACE156 RACE157 RACE1599 <i>“Two or more races” variable created by identifying the cases that have at least two races reported</i>	Don’t Know shown	
Type of Residence	Categories changed for 15-16		TYPEHOME15	Don’t Know shown	
Length of residence			RESIDLEN08	Don’t Know shown	
Persons residence owned or controlled by provider agency	New in 15-16		CONTPROV15	Don’t Know shown	
Person named on lease	New in 15-16		LEASE15	Don’t Know shown	
Person owns his or her own home	New in 15-16		OWNHOME15	Don’t Know shown	

	Diagnosis of ID		DIAGMR	Don't Know shown	
	Level of ID (Variable used for risk adjustment)		LEVELMR08	Unknown and unspecified shown; filtered for those with a diagnosis of ID (DIAGMR=2)	
	Other Disabilities	Categories changed for 15-16	DXMIPDMD13 DXMIPDAD13 DXMIPDBC13 DXMIPDPD13 DXMIPDOH13 DXAUTISM0813 DXCP13 DXBI13 DXNEURO13 DXCHEMDP13 DXDOWN0813 PRWISYND13 DXFETALALCH15 DXVISION15 DXHEARING15 DXNONE13	Don't Know included in denominators	
	Health variables	Categories changed for 15-16	HCCARVAS HCDIAB HCCANCER HCHIBP HCHICHL HCDYSPH15 HCPRESULC HCALZHEIM15	Don't Know included in denominators	
	Preferred Means of Expression	Wording of question changed 15-16	EXPRESS	Don't Know shown	

	Language		LANGUAGE		
	Overall Health	NO LONGER IN DEMOGRAPHICS SECTION			
	Mobility (Variable used for risk adjustment)		MOBILITY08	Don't Know shown	
	Support to Manage Self Injurious Behavior (Variable used for risk adjustment)		SELFINJ08	Don't Know shown	
	Support to Manage Disruptive Behavior (Variable used for risk adjustment)		DISBEH08	Don't Know shown	
	Support to Manage Destructive Behavior (Variable used for risk adjustment)		UNCPBEH08	Don't Know shown	
	Guardianship	Categories changed 15-16	LGLSTAT15	Don't Know shown	
	Relationship of guardian	New in 15-16	GUARDRELAT15	Don't Know shown	
	Owns or leases home	NO LONGER IN SURVEY			

Choice and Decision-making	Proportion of people who reported they chose or had some input in choosing where they live <i>if not living in the family home</i> (Adjusted Variable)		<p>CHOSHOM2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> 0 no 1 had at least some input</p>	<p>Filtered for Section II (INVL_CR2_15=0) and for residence type (typehome08 not equal to 5 (parent or relatives home))</p> <p>Risk adjusted</p>	
	Proportion of people who reported they chose or had some input in choosing their roommates <i>if not living in the family home</i> (Adjusted Variable)		<p>HOUSEMATES2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> 0 no 1 had at least some input</p>	<p>Filtered for Section II (INVL_CR2_15=0)</p> <p>Risk adjusted</p>	
	<p>Proportion of people reported to have a job in the community and who reported they chose or had some input in choosing their job* (Adjusted Variable)</p> <p>* reported for those who were determined to have a paid community job from Background section</p>		<p>CHOSJOB2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> 0 no 1 had at least some input</p>	<p>Filtered for Section II (INVL_CR2_15=0) and for PAIDCOMMJOB2=1</p> <p>Risk adjusted</p>	
	Proportion of people who reported they have a day program or activity and chose or had some input in choosing their day program or activity (Adjusted Variable)		<p>CHOOSDAY2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> 0 no 1 had at least some input</p>	<p>Filtered for Section II (INVL_CR2_15=0)</p> <p>Risk adjusted</p>	

	<p>Proportion of people who reported they choose or help decide their daily schedule (Adjusted Variable)</p>		<p>SCHEDULE2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> <i>0 no</i> <i>1 had at least some input</i></p>	<p>Filtered for Section II (INVL_CR2_15=0)</p> <p>Risk adjusted</p>	
	<p>Proportion of people who reported they choose or help decide how to spend free time (Adjusted Variable)</p>		<p>FREETIME2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> <i>0 no</i> <i>1 had at least some input</i></p>	<p>Filtered for Section II (INVL_CR2_15=0)</p> <p>Risk adjusted</p>	
	<p>Proportion of people who reported they chose or help decide what to buy with their spending money (Adjusted Variable)</p>		<p>CHOOSBUY2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> <i>0 no</i> <i>1 had at least some input</i></p>	<p>Filtered for Section II (INVL_CR2_15=0)</p> <p>Risk adjusted</p>	
	<p>Proportion of people who reported they chose or were aware they could request to change their case manager/service coordinator (“yes” and “no, but can change” responses)</p>		<p>CHOOSCM2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i> <i>0 no</i> <i>1 had at least some input</i></p>	<p>Filtered for Section II (INVL_CR2_15=0)</p>	<p>YES</p>

	Proportion of people who reported they chose or were aware they could request to change their staff (“yes” and “no, but can change” responses)		<p>CHOOSSTAF2</p> <p><i>Recoded variable in which response options are collapsed into the following:</i></p> <p>0 no</p> <p>1 had at least some input</p>	<p>Filtered for Section II (INVL_CR2_15=0)</p> <p>Risk adjusted</p>	YES
Work	<p>Proportion of people who were reported to have a job in the community*</p> <p>* reported for those who were determined to have a paid community job from Background section</p>	Changed how asked and analyzed in 15-16	<p>PAIDCOMMJOB2</p> <p><i>Variable created indicating those who have at least one of the following marked “yes”</i></p> <p>1) PAIDCOMMJOBIND15</p> <p>2) PAIDCOMMJOBGRP15</p> <p><i>Creates and makes DK missing</i></p>		YES
	<p>Proportion of people who were reported to have a job in the community by type of employment support*</p> <p>* reported for those who were determined to have a paid community job from Background section</p>	Changed how asked and analyzed in 15-16	<p>commwork_type_Individual</p> <p>commwork_type_Group</p> <p>Variables created to identify types of paid jobs in the community and whether public support is received for that job.</p> <p>Variables created using</p> <p>1) PAIDCOMMJOBIND15 and PCJISERV15</p> <p>2) PAIDCOMMJOBGRP15</p>	Filtered for PAIDCOMMJOB2=1	

	<p>Average number of bi-weekly hours by type of community employment support</p>	<p>Changed how asked and analyzed in 15-16</p>	<p>Filter separately for commwork_type_Individual=1, commwork_type_Individual=2 and commwork_type_Group=1</p> <p>Then compare means with the variable PCJIHOURS15 or PCJGHOURL15 (for commwork_type_group=1)</p>	<p>Filtered for PAIDCOMMJOB2=1</p>	
	<p>Average bi-weekly gross wages by type of community employment support</p>	<p>Changed how asked and analyzed in 15-16</p>	<p>Filter separately for commwork_type_Individual=1, commwork_type_Individual=2 and commwork_type_Group=1</p> <p>Then compare means with the variable PCJIWAGES15 or PCJGWAGES15 (for commwork_type_group=1)</p>	<p>Filtered for PAIDCOMMJOB2=1</p>	
	<p>Average bi-weekly hourly wage by type of community employment support</p>	<p>Changed how asked and analyzed in 15-16</p>	<p>Filter separately for commwork_type_Individual=1, commwork_type_Individual=2 and commwork_type_Group=1</p> <p>Then compare means with the variable PCJIHWAGE or PCJGHWAGE (for commwork_type_group=1)</p> <p>PCJIHWAGE and PCJGHWAGE were computed by dividing the wage in two week period by the wages earned in two week period</p>	<p>Filtered for PAIDCOMMJOB2=1</p>	

	<p>Proportion of people who were reported to have a job in community employment who worked 10 of the past 12 months in community employment</p>	<p>No Longer in Survey</p>			
	<p>Average length of employment in current job for people who were reported to have a job in the community</p>		<p>Calculated variable using JOBYRS and JOBMOS to equal total months</p>

Appendix C

Sampling Procedures

SAMPLING AS REPORTED IN 2015-16 STATE WORK PLANS				
	Sampling Description	Included Programs	Total Population in program (eligible for ACS)	Excluded Programs
AL	Random sample from ~ 5,500 people receiving services through the ID and LAH Home and Community Based Services waivers. In addition, a selected sample of 30 individuals who have participated in a statewide planning pilot using Personal Outcome Measures (CQL) as the foundation for person-centered planning.	LAH 1915(c) Persons receiving supports and services in their own home or family home.	569	Non-waiver population
		ID 1915(c) Persons receiving supports and services through contracted residential providers	5,260	
AR	Stratified random sampling methodology (sample based on CM Provider.)	1915 HCB WAIVER (There are about 100 programs-including residential and non-residential)	4,000+	

	<p>Each CM provider has at least 1 case selected. (There are ~ 100 providers)</p> <p>ICF sample is pulled random sample. ICF system is separate.</p>	ICF-ID	960	
AZ	Random pull from total service population	Long Term Care (LTC) 1115 Waiver	28,070	
		Non-LTC State only	7,000	
CO	<p>Colorado is using a stratified random sample of all adults 18 and over enrolled in the Developmental Disabilities Waiver, the Supported Living Services Waiver, or receiving Supported Living Services through state funding, who receive at least one service in addition to case management. The sample will be stratified by the data team at HCPF based on the total number of clients served by each of 21 agencies.</p>	HCBS-DD 1915 (c): All adults age 18 and over, enrolled in HCBS-DD who receive at least one service other than case management.	3,247	
		HCBS-SLS 1915 (c): All adults age 18 and over, enrolled in HCBS-SLS who receive at least one service other than case management.	2,769	
		State-SLS State General Fund: All adults age 18 and over, enrolled in State-SLS who receive at least one service other than case management.	642	
CT	<p>CT DDS does a random sample pull from all individuals meeting the criteria of age 18 or over as of July 1, 2015 and receiving at least one funded service in addition to Case Management.</p>	<p>DDS Waiver Population HCBS 1915(c) Individuals in one of the four HCBS adult waivers DDS Manages including people in the Autism Waiver</p>	9,869	<p>People without case managers</p>

	All individuals meeting these criteria are pulled from CT central database (CAMRIS); the state then uses Excel to assign each a random number. The records are then sorted by that random number and the first 2,400 are used as the randomly selected survey participants, from which CT tries to interview at least 400.	Non-Waivered DDS Funding Individuals who are not enrolled in an HCBS waiver but are receiving at least one funded service in addition to Case Management		
		ICF are included.		
DC	Sample of people who receive service coordination and at least one service. People must also affirmatively consent to participation in NCI.	HCBS Waiver: People who receive service coordination and at least one service	~ 1,575	State Plan Only Medicaid: People who receive service coordination and state plan services only
		ICF-ID: People who receive service coordination and live in an ICF.	~330	
DE	Sample was randomly pulled from list of individuals receiving services from the Delaware Division of Developmental Disabilities. Sample included HCBS waiver participants receiving case management services and individuals receiving Family Support Services, plus one other service	HCBS Waiver 1915(c): Adults age 21 and older who are receiving residential support services through the Home and Community Based Services Waiver.	1,106	HCBS receiving only FSS supports funded through HCBS 1915(c)
		HCBS Waiver 1915(c): Adults age 21 and older who live at home and receive Family Support Services (FSS) AND participate in a Day Program funded through the HCBS.		ICF (4 people remain)

FL	Stratified random sample taken from all individuals age 18 and over receiving services through the iBudget HCBS waiver. Stratified by Support Coordinator (there are 800-900) and sample up to two individuals from each coordinator.	HCBS 1915(c) Waiver: Individuals with IDD (primarily ID, Cerebral Palsy, Spina Bifida, Prader Willi, and Autism)	~30,000	Non-waiver population
GA	Individuals receiving services through the NOW and COMP Home and Community Based Services or receiving State Funded Services are included in the population. A random sample of 480 individuals is selected from the population, stratified by region (regional samples are proportionate to regional representation in total population).	HCBS 1915(C) Federal IDD	13,000	Individuals who received the NCI interview within the 12 previous months are excluded.
		State Funded State Individuals age 18 and over with IDD	1,760	
HI	A random sample was drawn from the entire service population of adults over age 18 who receive at least one waiver service besides case management.	Developmental Disabilities Division HCBS 1915 (c) ID/DD	2,354	
IL	A random sample of 400 adults selected from the entire population of adults participating in Illinois' Adults with Developmental Disabilities Waiver. The	Adult waiver HCBS 1915	19,774	State operated developmental centers funded by ICF/ID

	<p>selection of adults for the sample is completed by the Information Services department using a random number generator to assign numbers to all participants, placing the participants in numerical order, and selecting the first 400 names that appear. In addition, an additional 40 participants (numbers 401 – 440 on the randomly ordered list) have been selected for use as substitutes in the event that any of the original sample of 400 are unavailable or unwilling to participate. If substitutes are needed, they will be used in numerical order beginning at 401.</p>			<p>ICF/DD ICF/ID</p>
<p>IN</p>	<p>The actual sample size will vary throughout the course of a year, as waiver participation changes with additions and departures from the waiver program. On a quarterly basis, Indiana calibrates the targeted sample size with actual waiver participation numbers and adjusts the sample size accordingly. The sample will be stratified by waiver population (Family Supports (FS) waiver, Community Integration and Habilitation (CIH) waiver</p>	<p>Family Supports Waiver (FSW) HCBS 1915(c) (capped waiver program).</p>	<p>10,613</p>	<p>Those selected for prior NCI survey in year prior from the potential pool of individuals</p>
<p>Community Integration & Habilitation Waiver (CIH) HCBS 1915(c) (uncapped waiver program).</p>	<p>8,455</p>			
<p>Money Follows the Person-- Money Follows the Person Rebalancing Demonstration Grant</p>	<p>99</p>			

	<p>populations, Money Follows the Person (MFP) waiver). Sample size for each waiver will be determined using a 95% confidence level and 5% margin of error threshold (based on population as of July 1, 2015). Sample is also proportional based on the total number of Individuals who reside in each BDDS District. The percentage of waiver participants by waiver type residing in each BDDS District shall be multiplied by the total number of targeted surveys to establish a proportioned sample population.</p>			
KS	<p>The KDADS Fiscal Department pulls a random stratified sample of consumer names that consist of only those individuals who are on the IDD Waiver. KS stratifies the NCI-DD by the 26 Community Developmental Disability Organization (CDDO). KS uses unduplicated eligibility (DD=8,787 customers) to come up with a percent for each CDDO. KS then uses that percent to determine the strata.</p>	IDD 1915 (c) waiver	8,787	
KY	<p>Stratified random sample by funding type</p>	SCL 1915 (c)	4,279	

		Michelle P 1915 (c)	4,577	
		State general funds	430	
		MFP	99	
		ICF/IID	368	
LA	Random sample of all adults, 18 years and older, receiving developmental disability services. This includes ICF/DD residents, HCBS waiver recipients, and adults receiving state-funded services. All names are placed in a single file and a random sample is selected.	New Opportunity, Children’s Choice, Residential Options, and Support Waivers Medicaid, HCBS waiver	10,426	
		Large & small, public & private ICF/DDs Medicaid, ICF/DD	2,326	
		Individual & Family Support State funding	7,548	
MA	A random sample of all adults 22 and over receiving at least one service since November 2, 2015 in addition to service coordination/ case management.	State fund and Waiver Participants Total population numbers	19,197	ICF/ID Autism Only— eligibility just changed. Small pool and in starter stage. Praeder Willi

				--Financial Assistance - AWC
ME	Random selection of 1,000 consumers to produce a final sample of 400 surveys.	Case management (Medicaid): Medicaid State Plan Case Management is an entitlement for all persons who qualify for developmental services. Case management is not available to any other (adult) population.	6,263	
	Person needs to receive one other service in addition to Case Management services.			
	Sample selected from MaineCare DSS database			
MI	Random sample of adults 18 and over.	BHDDA enrollment: State/DDI funding source:	34,509	
	Medicaid and non-Medicaid individuals receiving at least 3 services (service outside of case management, assessment, crisis and respite)			
MN	The population includes any adult 18 years or over noted in state records as a person with developmental disabilities on	Home Care only, State Plan funded:	19,000	
		Waivers (DD, TBI, CADI, CAC) 1915c	34,500	

	a DD, or a long-term care screening document who also receives case management and at least one long-term service or support. This service could be a State Plan, or state grant service, or a service funded through a waiver.	Support Grants, State funded:	1,900	
		ICF/DD, state plan funded:	1,725	
MO	Random sample of the service population of adults over 18, enrolled in the Comprehensive Waiver, and receiving at least one service besides case management. Random sample is a statistically valid sample based upon the size of the total service population.	HCBS 1915(c) Comprehensive Waiver participants:	8,000	Support Wavier, Autism Waiver, Lopez Waiver, and Partnership for Hope Waiver HCBS 1915(c)
				ICF/ID
				DMH: General Revenue, PAC, SB40, etc.
MS	A random sample of 1,200 adults in the IDD Mississippi Medicaid Waiver MMIS Database. These adults will be 21 years or older, according to Mississippi’s definition of an “adult.”	IDD Waiver 1915c:	2,002	1915i funded by Medicaid
				State Funded-Only IDD

				Persons living in ICF-IDD: funded through Medicaid/CMH State Funded
NC	<p>Random samples of adults 18 and over who received at least one I/DD service other than case management were selected from within each of the State's Local Management Entity-Managed Care Organization catchment areas and Developmental Treatment Centers. LME-MCO sample sizes were approximately proportional to their percentages of the state I/DD population served. Targeted sampling within Developmental Centers resulted in a final sample percentage of individuals served in these settings approximately three times the actual percentage.</p>	ICF/ID and HCBS 1915b, 1915 b/c, 1915 c waivers	Approximately 20,000	
NY	<p>Random sample of the entire service population of adults over 18 receiving at least one service besides case management. The sample includes people getting residential, day and family support</p>	People receiving support through waivers and ICF/IID funding are included	103,000	Those receiving "light services"

	services as well as people who are self-directing their services.			
NV	Using geographic stratification, 700 people will be included in sample pull. Stratified by region	SC + SLA funded through Medicaid and State general fund. Includes clients 18 years and over who are receiving service coordination plus supportive living arrangements.	1,453	Clients only receiving service coordination
		SC + JDT funded through Medicaid and State general fund. Includes clients 18 years and over who are receiving service coordination plus jobs and day training	1,592	ICF--consumers housed in the 48 bed Intermediate Care Facility.
OH	The sample is pulled from the DODD data warehouse. Anyone over age 18 who is receiving at least one service in addition to case management (Case management and family support alone do not count as services) administered by county board, or lives in ICF, has the potential to be part of the random sample.	1915 c waiver. Total number of people served:	35,000	
		ICF/ID,	6,000	

OK	Representative random sample of 400 is pulled from state database of all adults receiving HCBS services in Oklahoma. -	In-Home Supports Waiver (IHSW); Community Waiver (CW)—including individuals recently transitioning from state-run institutions, individuals receiving residential support, and individuals not receiving residential supports; and Homeward Bound Waiver (HBW)	5,102	
PA	PA uses a statewide random sample which is not stratified across 48 counties and county joiners. Individuals enrolled in waiver, base, and private and public ICF/ID funding are included in the sample.	Consolidated Waiver HCBS 1915(c)	17,088	People previously surveyed the prior year are not included in sample.
		Person/Family Driven Supports (P/FDS) Waiver HCBS 1915(c)	12,264	
		Base Funding (State)	12,620	
		ICFs/ID	2,913	
RI	Sample comes from Medicaid database. Stratified by the 9 agencies under the consent decree with percent of sample based on agency size, and the remaining agencies as a group	Adults served through BHDDH/DDD (Global Waiver (1115))	Total population of both programs: 3,800	ICFs (managed by Department of Health)
		State plan		

<p>SC</p>	<p>SCDDSN will use a random sample of all adults 18 and over receiving at least one service (in addition to case management). The sample is drawn from the names included in the QIO Quality Assurance review of provider agencies. The QIO includes representation from each agency that is selected for review, but not each agency is reviewed each calendar year. Based on compliance scores. If they score over 75% in QA review (largely based on waiver reviews) they have 18-month review, if less, annual. ~ 75%-80% of state agencies are included in each NCI data cycle</p>	<p>Residential Services: HCB Waiver 1915(c) and State Funded: Residential services in a DDSN contracted residential setting. (The number in the State funded category will be limited.)</p>	<p>10,980</p>	<p>ICFs</p>
		<p>Day and Employment Services HCB Waiver (1915(c)) and State Funded: Day and Employment Services through a DDSN contracted provider. (The number in the State funded category will be limited.)</p>		
		<p>In-home supports: HCB Waiver (1915(c)) and State Funded: In-home supports through a DDSN contracted provider. (The number in the State funded category will be limited.)</p>		
<p>SD</p>	<p>Sample stratified by program</p>	<p>CHOICES HCBS 1915(c) Adults who receive residential, day, employment, and case management services from any of the 19 service providers in South Dakota.</p>	<p>2,600</p>	<p>Those that participated in the Adult Consumer Survey the previous</p>

		<p>Family Support 360 HCBS 1915(c): Adults who receive supports to continue living within the family home or to live independently.</p> <p>Adults who receive supports to continue living within the family home or to live independently.</p>	340	cycle were removed from the sample
		<p>South Dakota Developmental Center (SDDC)</p> <p>ICF/IID: Adults receiving institutional level of care at the only ICF/IID supporting adults in South Dakota.</p>	140	
		<p>Community Training Services (CTS) South Dakota State General Funds: Adults who are receiving State funded services and supports such as day and residential services</p>	300	
TN	<p>A random sample, stratified by the three grand regions in Tennessee—East, Middle, and West—of adults receiving at least one waiver service through the Department of Intellectual & Developmental Disabilities.</p>	<p>Statewide Waiver 1915 (c)</p> <p>Individuals must have diagnosis of ID, IQ 70 or below to meet eligibility (must also meet financial eligibility). Individuals supported have an array of service needs from employment to intensive medical and behavioral supports.</p>	4,900	ICF/IID
		<p>Comprehensive Aggregate Cap (CAC) 1915 (c)</p> <p>Individuals must have diagnosis of ID, IQ 70 or below to meet eligibility (must also meet financial eligibility). Individuals supported have an array of</p>	1,821	

		<p>service needs from employment to intensive medical and behavioral supports.</p>		
		<p>Self-Determination Waiver 1915 (c) Individuals must have diagnosis of ID, IQ 70 or below to meet eligibility (must also meet financial eligibility). Individuals supported have an array of service needs. The same services are available in the SD waiver as the other two waivers; however, this waiver has a cost cap of \$30,000 per year.</p>	<p>1,155</p>	
<p>UT</p>	<p>Random sample of 450 adults age 18 and over who receive home and community based services and receive at least one service in addition to support coordination. Also pulls a random sample of 25 adults 18 and over at state operated immediate care facility; sample size for the ICF/ID is consistent with ~ 5% of UT total population of people served. Anticipates a 90% participation rate with face to face surveys.</p>	<p>HCBS 1915(c)/State Funded</p>	<p>~5,300</p>	<p>Those surveyed the previous year</p>
		<p>Utah State Developmental Center State Operated ICF/ID</p>	<p>~205</p>	

VA	<p>Medicaid waiver recipient data are received from the Department of Medical Assistance Services and sorted by zip code. A birthdate cutoff is selected and all people under age 18 are removed from the dataset. All people are divided into one of five health planning regions based on their zip code.</p> <p>Sample is proportional: the number of people receiving services per region is determined and used to calculate target numbers for each health planning region. Data is randomly sorted within the appropriate health planning region. A sample double the target number is then selected to begin the data cycle.</p>	<p>ID Waiver C VA Intellectual Disability (ID) Waiver: Provides day support, personal assistance, prevocational, residential support, respite, supported employment, consumer directed services facilitation, assistive technology, companion services, crisis stabilization, crisis supervision, environmental mods, PERS, skilled nursing, therapeutic consultation, transition for individuals with ID</p>	~10,116	EDCD 1915c
				VA Elderly or Disabled w/Consumer Direction (0321.R03.00)
				Provides adult day health care, personal assistance, respite care, consumer directed services facilitation,

		<p>DD Waiver 1915c VA Individual & Family DD Support: Provides day support, in-home residential, personal care, prevocational, respite care, supported employment - group/individual, services facilitation, adult companion, assistive technology, crisis stabilization, crisis supervision, environmental mods, family/caregiver training, PERS, skilled nursing, therapeutic consultation, transition for individuals w/autism and DD</p>	<p>~1,053</p>	<p>PERS, transition coordination</p>
<p>DS Waiver 1915c VA Day Support HCBW for Persons w/ID: Provides day support, prevocational, supported employment for individuals w/ID ages 6 - no max age</p>	<p>~300</p>			
<p>Community ICF/ID ICF/ID Intermediate Care Facilities for Individuals with Intellectual Disability (ICF/ID)</p> <p>Provides comprehensive and individualized health care and rehabilitation services to individuals to promote their functional status and independence.</p>	<p>~481</p>			
<p>Nursing Facility with Dx ICF - SNF</p>	<p>~850</p>			
<p>State Training Center Residents ICF/ID Provides comprehensive and individualized health care and rehabilitation services to individuals to promote their functional status and independence.</p>	<p>~480</p>			

VT	VT used the complete list of adults age 18 and over receiving HCBS, who have received services for at least one year and who are out of high school, listed them by 10 providers and pulled a random sample of 14% at each agency. The exception is the smallest 2 agencies for which VT pulled a 20% sample. Of the 6 smaller agencies (including the supportive ISO that supports people self/family managing), VT picked 2 to participate this year (2 participated the first year and VT intends to have the last 2 participate next year	Developmental Disabilities Services	2,354	
		HCBS – Global Commitment for Health (1115)		
		Adults with developmental disabilities (ID and/or ASD) age 18 and over, in services for one year or more, no longer in high school.		
WA	Randomized sample of all clients on all HCBS waivers.	CORE Waiver HCBS 1915(c)	4,519	Personal Care State-only
		The purpose of the Core Waiver is to provide an alternative to Intermediate Care Facility for the Intellectual Disability (ICF/ID) placement for individuals who require residential habilitation services or live at home but		ICF/IIDs funded through State General Fund, Federal, and local

		<p>are at immediate risk of out of home placement due to one or more of the following extraordinary needs.</p> <ul style="list-style-type: none"> • The individual has extreme and frequently occurring behavior challenges resulting in danger to health or safety or • Has had 18 or more days of inpatient psychiatric care in the past 12 months or • The individual lives in an ICF/ID and requests community placement or • The person requires daily to weekly one-on-one support, supervision and 24-hour access to trained others to meet basic health and safety needs. 		<p>The Developmental Disabilities Administration (DDA) operates four Residential Habilitation Centers (RHCs). The RHCs currently serve around 850 people, down from a census of more than 4,000 people in the early 1960s. The census varies as all facilities</p>
--	--	---	--	--

		<p>Community Protection HCBS 1915(c)</p> <p>The purpose of the Community Protection Waiver is to provide an alternative to ICF/ID placement for individuals who:</p> <ul style="list-style-type: none"> • Are at least 18 years of age, and • Meet the criteria for ICF/ID level of care, and • Live or are moving into the community, and • Require 24-hour, on-site, awake staff supervision to ensure the safety of others, and • Require therapies and other habilitation, and • Are found by DDD to meet the criteria for an “individual with community protection issues.” 	<p>426</p>	<p>will admit some individuals for short-term care, treatment, or assessment.</p> <p>Individuals who meet eligibility requirements:</p> <ul style="list-style-type: none"> • Are enrolled and eligible clients of DDA; • Are 18 years of age or older; • Meet Medicaid eligibility and need active treatment as defined in the Code of Federal Regulations; • Who have a functional or intellectual disability that requires ICF/ID
		<p>IFS Waiver HCBS 1915(c)</p> <p>Services to individuals continuing to reside in their family home.</p> <p>This waiver went live June 1, 2015. The sample was pulled before the waiver transition period. It is unlikely that individuals receiving services through this waiver will be included, but it is possible that someone could transition to this waiver during the survey cycle. Still in transition, no count at this time.</p>	<p>In transition – count unavailable</p>	

		<p>Basic Plus Waiver HCBS 1915(c) The goal of the Basic Plus Waiver is to support individuals (who require the level of care provided in an ICF/ID) who choose to live in their community. This is accomplished by coordination of natural supports, community resources/services.</p>	<p>7,769</p>	<p>level of support and supervision; or</p> <ul style="list-style-type: none"> • Need 24 hour per day nursing level of care
