

National Core Indicators®--Intellectual and Developmental Disabilities 2020-21 In-Person Survey (IPS) Report

Rights and Respect

People receive the same respect and protections as others in the community.

What to know about the presentation of Satisfaction data:

Charts with un-collapsed weighted NCI average

Here's what [collapsed](#) data are

State and weighted NCI averages

The number of respondents (N) is not weighted

Here's what [weighting](#) data means for comparisons

Rights and Respect

Table 1. Others (who do not live in the home) let person know before entering home ('yes' responses only).....	6
Table 2. Has a key to the home ('yes' responses only; proxy respondents allowed)	8
Table 3. Wants a key to the home (if does not have one).....	9
Table 4. Can lock bedroom if wants ('yes' responses only; proxy respondents were allowed for this question).....	11
Table 5. Others let person know before coming into person's bedroom ('yes' responses only).....	13
Table 6. Has a place to be alone in the home ('yes' responses only)	15
Table 7. Can be alone with friends or visitors at home ('yes, can be alone with friends or visitors' responses only) .	17
Table 8. There are rules about having friends or visitors in the home ('there are rules against having friends or visitors in your home' responses only)	19
Table 9. Can stay at home if others in the house go somewhere (if not living alone)('yes' responses only; proxy respondents were allowed for this question).....	21
Table 10. Others read person's mail or email without asking ('yes, mail/email is read without permission' responses only)	23
Table 11. Can use phone and internet when wants ('yes, can use anytime, either independently or with assistance' responses only)	25
Table 12. Has a cell phone or smartphone ('yes' responses only).....	27
Table 13. Wants a cell phone or smartphone (if does not have one).....	28
Table 14. Reasons does not have a cell phone or smartphone (if does not have one but wants one).....	29
Table 15. Staff treat person with respect ('yes – all staff, always' responses only)	31
Table 16. Has attended a self-advocacy group, meeting, conference or event or had the opportunity and chose not to ('yes' and 'had the opportunity but chose not to participate' responses; proxy respondents were allowed for this question)	33
Table 17. Has voted in local, state, or federal election, or had the opportunity and chose not to ('yes' and 'had the opportunity to register or vote but chose not to' responses; proxy respondents were allowed for this question) ...	35

Where do these data come from?

All information in this section comes directly from the person receiving services, or for some select questions, from a “proxy” respondent. A proxy respondent is someone who knows the person well (e.g., a family member), proxy respondents may not be a case manager/service coordinator. Items that allow for proxy respondents are noted in the table title.

Read more about why we allow proxy respondents for select questions in the IPS in the Overview chapter of this report.

Items in this chapter are a part of the NCI Health, Welfare, and Rights domain (or topic area) and comprise the “Rights and Respect” sub-domain (a specific area of concern within the domain). The Rights and Respect sub-domain includes items that help determine whether “People receive the same respect and protections as others in the community”. Read more about NCI domains and sub-domains in the Overview chapter of this report.

What are “collapsed” data?

Many questions in the IPS allow respondents to answer a question with “middle” response like “maybe”, “sometimes” or “in-between”. The tables in this section present collapsed data. That means that two or more response options are grouped together if they are considered to reflect a positive outcome. The table titles explain which options were grouped.

To see the breakout of responses for each option, please see Appendix C.

What is weighting and why do we do it?

The NCI-IDD averages are “weighted” to reflect the states’ relative population and sample sizes. We created the weights using the state’s number of valid surveys and its total survey-eligible population. This way, a state that provides services to a larger number of people but uses a sample similar in size to other states has a greater influence on the overall NCI-IDD average (that is, its contribution is *proportional to its service population*).

In this survey year, CA intentionally oversampled by geographical regions to get more focused insights, so their weights are calculated slightly differently (using

the number of completed surveys and service population sizes in each subpopulation or region). You can read more about this in the Methodology section of the Overview chapter.

The number of respondents (N) for each question *is not* weighted.

Presentation of state and weighted NCI-IDD averages

Averages

For the most part, the state outcomes are shown in descending order of percentage and are categorized as statistically significantly above the NCI-IDD Average, within the range of the NCI-IDD Average, or significantly below the NCI-IDD Average. Statistical significance is taken to be at or below the .01 level. For those states that fall within the NCI-IDD Average range, their ‘always’ or ‘yes’ response was not statistically different from the NCI-IDD Average. Other tables show the states listed in alphabetical order and are not tested for significance.

Tables that show significance also break out average results for each state by the type of residence: ICF/IID or other institutional settings, group residence, own home, parent/relative’s home, foster or host home. Figure A on the following page shows, by state, the percentage of people surveyed in each residence type. Please note though that:

- Significance testing was not performed on the breakouts by residence
- The number of people in each residential setting is often too small to allow for valid state-to-state comparisons
- And in many cases, statistically valid conclusions cannot be drawn about differences in results between residence types

Still, we provide this information for states’ internal purposes. It should not be used to compare one state with another.

To protect people’s privacy, we do not show the data when fewer than 20 people from a state or residence type responded to a question (though their responses are included in the NCI-IDD average).

Important note on Impact of COVID-19

The 2020-21 NCI-IDD IPS data collection cycle began July 1, 2020 and ended June 30, 2021. As COVID-19 continued to spread across the United States, states were impacted in various ways throughout the year. These data cannot fully assess what impact the pandemic had on data collected at different times throughout the year. While these data will serve as an important baseline, and meaningful way for states to understand the overall impact of services on people being served, these data should be read with caution.

To help better understand the overall impact of COVID-19 on people receiving services, NCI-IDD added a state-optional COVID-19 Supplement to all NCI-IDD Surveys. The COVID-19 Supplement is intended to support the understanding of the experience of people with disabilities and their families at the beginning of the COVID-19 pandemic, and their interactions with services during that time. The NCI IPS COVID-19 Supplement can be found [here](#).

¹ All Californians with an intellectual or developmental disability as defined by California law have both a civil right and an individual entitlement to receive services from the California Department of Developmental Services. These statutory requirements make California's service system unique and could impact comparisons between its survey results and the results of other states.
